

OmniVin R

>>> Grape Seed Extract OmniVin R Product data-sheet

OmniVin R is a budget grape seed extract developed for anti-oxidant purposes in (pet) food applications.

>>> ORIGIN, PRODUCTION

For the production of its grape seed extracts, OmniChem uses a continuous solid/liquid extraction process. The crude extract is further purified using liquid/liquid extraction by appropriate selection of the extraction solvents. Further downstream purification steps remove a variety of impurities. The purified extract is spray-dried and a granular product is obtained using fluidized bed technology.

OmniVin R is a 100 % natural material extracted from carefully selected grape seeds (origin: France) using dedicated strictly controlled production facilities. No added preservatives or additives are used in the production of OmniVin R.

>>> USAGE

OmniVin R can be used in (pet) food or nutraceutical formulations. It is used for its anti-oxidant properties.

>>> STORAGE AND HANDLING

OmniVin R does not require special storage conditions and has a shelf life of min. 5 years if stored in a dry area in its original closed packaging. The product is not frost sensitive and normal ambient storage temperatures (i.e. 5 - 25°C) suffice.

Prolonged exposure of OmniVin R to light can cause a gradual colour shift. This does not influence technical performance of the product unless colour is a critical parameter in the application. Storage of OmniVin R open to the atmosphere can result in moisture uptake from the surroundings. Therefore reseal the inner plastic bag and keep the lid on the fibre drum if OmniVin R is not in use.

Due to its granular form OmniVin R produces little or no dust during handling.

>>> PACKAGING

OmniVin R is available as a spray-dried granular product in 25kg fibre drums lined with an inner polyethylene bag.

>>> REGULATORY & FURTHER INFORMATION

Information on usage and applications can be found in our Application Fact Sheet. Our R&D department can provide you further detailed information on composition and regulatory status.

CAS Nr.: 84929-27-1

The information provided in this technical data sheet is based on the present state of our knowledge. Some of the applications mentioned in this document are protected by patent law. Ajinomoto OmniChem nv/sa cannot be held responsible for patent law infringements and the customer should contact the patent holder if so required. Due to the many process parameters involved we are not able to submit a general recommendation. It only shows without liability on our part the uses to which our products can be put. However, Ajinomoto OmniChem nv/sa cannot be held responsible for the consequences of the application of the above described product.
